

# Francisco Ramos

---

I am a hard working dedicated graduate of the University of California Riverside. I came from a humble household, and have high hopes and aspirations for my community and career. I am the first in my family to attend college and graduate with honors. I hold an Associate of Arts and Bachelors Degree, Phi Beta Kappa, Honors Society.

My own personal ethics and morals have lead me to a life of public service. Knowing how many in our community need a voice in their own plights, has lead me to become an experienced advocate with pointed communication. At every step of my life since high school I have given back to my community. Most of what you see in this letter is a story of myself lending my time as a volunteer to various community groups. Volunteering with the essential purpose of representing and working to help to help my community in many ways.

Politically, my involvement in volunteer organizations has been as follows: I am the former Chairman of the Riverside County Young Democrats, 2017-2018, I also am a current Assembly Delegate Member for the California Democratic party, representing Democrats in Assembly District 42, Further, I am the chairman for the Riverside County Democratic Party, "Get Out the Vote" committee. In these endeavors, my teams and I have achieved many successes.

I am proud to stand on my success with these volunteer organizations. In my work for the Riverside County Democratic Party, we achieved a new level of success in reaching a very large amount of Democrats in digital outreach. In this election cycle, we reached over 150,000 Democrats county-wide in a new digital effort. Further as an assembly delegate the plight of the homeless has been my central passion. In March 2017, I passed a resolution in front of the California Democratic Party, entitled "Focus on Homelessness 2017." That resolution demanded greater accountability from endorsed Democrats, to care for their homeless populations.

At my core are fairness and a sense of justice. As you have read, my life actions have been dedicated to those core values. They are what drive me as an individual and always weigh heavily on my work ethic. As a person, activist and being, they are my purpose in life. Thank you for reading this letter and taking the time for your consideration.
